

adhesives to construct the device when it is made from metal, plastic or wood.

IN THE CLAIMS:

Please cancel claims 6-9 and 16-19.

1. (Thrice Amended) An assembly comprising a fixture and at least one device for securing at least one suction cup to the assembly, said suction cup having a compressible head attached to a neck, the neck attached to an engagement member, said device comprising:

a first pair of planar generally parallel, rigid wires;

a second pair of generally parallel, rigid wires co-planar with said first pair of rigid wires, each wire of said second pair of rigid wires is transverse to each wire of said first pair of rigid wires defining a generally rectangular opening for receiving the head and for retaining the neck in said opening; and

at least two fastener arrangements for fastening said device to the fixture.

11. (Twice Amended) An assembly comprising:

a first pair of planar generally parallel, rigid wires;

a second pair of generally parallel, rigid wires co-planar with said first pair of rigid wires, each wire of said second pair of rigid wires is transverse to each wire of said first pair of rigid wires, defining a generally rectangular opening;

a fastener arrangement for fastening said assembly to a fixture; and

a suction cup having a compressible head attached to a neck, the neck attached to an engagement member, said head being insertable into said opening and said neck being retainable in said opening and said generally rectangular opening for receiving the head and for retaining the neck.
